Publications of Habib Ammari

Full-texts are available at `http://www.sam.math.ethz.ch/~hammari/reprints.html`.

Monographs

1. H. Ammari, B. Davies, and E.O. Hiltunen, Mathematical theories for metamaterials: From condensed matter theory to subwavelength physics. *NSF-CBMS Regional Conf. Ser.*, Volume 136, American Mathematical Society, 2026, 314 pages.

2. H. Ammari and B. Davies, Metamaterial Analysis and Design. *De Gruyter Series in Applied and Numerical Mathematics*, Volume 9, 2023, 114 pages.

3. H. Ammari, B. Fitzpatrick, H. Kang, M. Ruiz, S. Yu, and H. Zhang, Mathematical and Computational Methods in Photonics and Phononics. *Mathematical Surveys and Monographs*, Volume 235, American Mathematical Society, Providence, 2018, 509 pages.

4. H. Ammari, J. Garnier, H. Kang, L. Nguyen, and L. Seppecher, Mathematics of Super-resolution Biomedical Imaging. *Modelling and Simulation in Medical Imaging*, Volume 2, Imperial College Press, London, 2016, 687 pages.

5. H. Ammari, E. Bretin, J. Garnier, H. Kang, H. Lee, and A. Wahab, Mathematical Methods in Elasticity Imaging. *Princeton Series in Applied Mathematics*, Princeton University Press, 2015, 230 pages.

6. H. Ammari, J. Garnier, W. Jing, H. Kang, M. Lim, K. Sølna, and H. Wang, Mathematical and Statistical Methods for Multistatic Imaging. *Lecture Notes in Mathematics*, Volume 2098, Springer-Verlag, Berlin, 2013, 361 pages.

7. H. Ammari, An Introduction to Mathematics of Emerging Biomedical Imaging. *Mathématiques et Applications*, Volume 62, Springer-Verlag, Berlin, 2008, 198 pages.

8. H. Ammari, H. Kang, and H. Lee, Layer Potential Techniques in Spectral Analysis. *Mathematical Surveys and Monographs*, Volume 153, American Mathematical Society, Providence, 2009, 202 pages.

9. H. Ammari and H. Kang, Polarization and Moment Tensors: with Applications to Inverse Problems and Effective Medium Theory. *Applied Mathematical Sciences Series*, Volume 162, Springer-Verlag, New York, 2007, 312 pages.

10. H. Ammari and H. Kang, Reconstruction of Small Inhomogeneities from Boundary Measurements, *Lecture Notes in Mathematics*, Volume 1846, Springer-Verlag, Berlin 2004, 238 pages.

Edited books

1. H. Ammari, Y. Capdeboscq, H. Kang, and I. Sim, Imaging, Multi-Scale and High Contrast PDE. *Contemporary Mathematics*, Volume 660, American Mathematical Society, Providence, 2016.

2. H. Ammari and J. Garnier, Inverse Problems and Imaging. *Panoramas et synthèses*, Volume 44, Société Mathématique de France, 2015.

3. H. Ammari, Y. Capdeboscq, and H. Kang, Multi-scale and High-Contrast Partial Differential Equations. *Contemporary Mathematics*, Volume 577, American Mathematical Society, Providence, 2012.

4. H. Ammari, Mathematical Modeling in Biomedical Imaging II: Optical, Ultrasound, and Opto-Acoustic Tomographies. *Lecture Notes in Mathematics: Mathematical Biosciences Subseries*, Volume 2035, Springer-Verlag, Berlin, 2011.

5. H. Ammari, J. Garnier, H. Kang, and K. Sølna, Mathematical and Statistical Methods for Imaging. *Contemporary Mathematics*, Volume 548, American Mathematical Society, Providence, 2011.

6. H. Ammari and H. Kang, Imaging Microstructures: Mathematical and Computational Challenges. *Contemporary Mathematics*, Volume 494, American Mathematical Society, Providence, 2009.

7. H. Ammari, Mathematical Modeling in Biomedical Imaging I: Electrical and Ultrasound Tomographies, Anomaly Detection, and Brain Imaging. *Lecture Notes in Mathematics: Mathematical Biosciences Subseries*, Volume 1983, Springer-Verlag, Berlin, 2009.

8. H. Ammari, Mathematical methods for imaging and inverse problems. Proceedings of the seminar held in Paris, 2007–2008. *ESAIM Proceedings*, 26. EDP Sciences, Les Ulis, 2009.

9. H. Ammari, Modeling and Computations in Electromagnetics: A Volume Dedicated to Jean-Claude Nédélec. *Lecture Notes in Computational Science and Engineering*, Volume 59, Springer-Verlag, Berlin 2007.

10. H. Ammari, H. Kang, Inverse Problems, Multi-Scale Analysis, and Homogenization. *Contemporary Mathematics*, Volume 408, American Mathematical Society, Providence, 2006.

Papers in peer-reviewed journals
