

# Gong show talks

## Tuesday

Anton Alekseev	Orbit method for the Virasoro algebra?
Misha Feigin	Dunkl Laplace-Runge-Lenz vector
Nikita Nikolaev	The Geometric WKB Method
Matteo Felder	Relations among theta graphs

## Thursday

Nuno Romao	Pair-of-pants decompositions and Pochhammer states
Florian Naef	String topology and configuration space of 2 points
Roman Riser	Quasi-Hermitian Random Matrices
Peter Elbau	Reconstructing a spinning object from X-ray data
Alexander Veselov	Universal formulas for Hilbert series of minimal nilpotent orbits
